

UNIVERSITY OF SOUTH ALABAMA

Department of Civil, Coastal, & Environmental Engineering
Graduate Certificate in Water/Wastewater Engineering

The Department of Civil, Coastal, & Environmental Engineering offers a Graduate Certificate in Water/Wastewater Engineering. This is an important sub-discipline of Civil/Environmental engineering that integrates physical, chemical, and biological processes into engineered designs of drinking water and wastewater management applications. Safe drinking water and appropriate wastewater management (both municipal and industrial) are critical to protecting public health, ecological health, and human/ur
